COMPLETE OPERATIONAL ONBOARDING MANUAL

- [1] Corporate Slack Bot & Live Deal-Room Commands:
- 1-Click Install: [Click Here to Authorize Veridence Bot into Slack](#)
 - Step A (Activate Key): Inside your deal room channel, run: `/veridence register VERI-SOVEREIGN-MOCK`
 - Step B (Trigger Audit): Run: `/veridence audit https://github.com/org/target-repo`
Instantly returns deterministic EBITDA liability valuation shifts, leaked secrets, IaC/PaC breaches, and GPL copyleft risks.
- [2] Continuous GitHub Risk Governance & Push Alerts:
- Install GitHub App: [Click Here to Authorize the Veridence GitHub Application](#)
 - Webhook Push URL: `https://www.veridence.agiphi.com/api/github/webhook`
 - Automated Behavior: Every commit/PR is parsed in an ephemeral sandbox. Breaches immediately dispatch alerts to Slack.
- [3] Executive Web Console Cockpit & REST API Integration:
- Live Web Dashboard: [Access Institutional Vault Dashboard \(https://www.veridence.agiphi.com/?view=dashboard\)](https://www.veridence.agiphi.com/?view=dashboard)
 - Developer Docs & MCP Spec: [API Reference & Model Context Protocol Spec \(https://www.veridence.agiphi.com/developer\)](https://www.veridence.agiphi.com/developer)
